

**TO: EASTERN VIRGINIA GROUNDWATER MANAGEMENT ADVISORY COMMITTEE MEMBERS:**

Ladies and Gentlemen

We are looking forward to the discussions that will take place at the next Eastern Virginia Groundwater Management Advisory Committee meeting on June 24<sup>th</sup>.

To help you prepare for the meeting, attached please find a matrix of potential alternative sources of water supply, one strawman proposal from the alternative structures workgroup and another from the trading workgroup.

These attachments are not final recommendations of the respective workgroups. Rather, they are still evolving vehicles for discussion both for you and the workgroups.

You will hear more about each draft proposal at the meeting. In addition, you will hear about the issues the existing workgroups believe still need to be covered as well as the issues confronting the two new workgroups that will begin meeting shortly.

On the 24<sup>th</sup>, you will be asked to comment on the work produced to this point and to provide guidance on the issues that still are to be discussed. Effectively, you will be asked to set the direction of the work of the workgroups over the next several months. A proposed timeline will also be provided to assist you in putting your guidance into context.

The meeting will begin with a brief report from JLARC. At the request of the legislature, JLARC is also studying issues around groundwater. You will get a sense of their approach and progress to date on this study.

Thank you for the time and energy you are devoting to this issue.

Scott Kudlas and Mark Rubin
